

Secure networks. Keep transit moving.

Firewall migration and network modernization
across distributed operational facilities.

DRAFT FOR APPROVAL

SECTOR

Public transit

FOCUS

Security + networking

PRIORITY

Service continuity

THE CHALLENGE

Public transit relies on connectivity between geographically distributed facilities. Updating the infrastructure that supports those operations calls for careful coordination between security, networking, and service delivery.

The engagement summary supplied for this website describes a public transit authority migrating next-generation firewalls and modernizing its network while operations continued. Client identity, delivery scope, and publication permissions remain to be confirmed.

THE MODERNIZATION FOCUS

Bring firewall migration and network modernization into one coordinated program, with operational continuity at the center of implementation planning.

SQUADRA SOLUTIONS

THE DELIVERY STORY

FROM ARCHITECTURE TO OPERATIONS

The supplied engagement description identifies two connected workstreams: next-generation firewall migration and infrastructure modernization across operational facilities. The final case study should explain the actual discovery, design, testing, cutover, and handover activities performed by Squadra.

Squadra publicly describes architecture, engineering, implementation, and operational support capabilities. These establish company context; they do not independently verify this engagement or its results.

REPORTED OUTCOMES - AWAITING CONFIRMATION

01 A more consistent security foundation

The supplied homepage reports replacement of legacy infrastructure with hardened, standardized architecture.

02 Continuity through live cutovers

The supplied homepage reports zero downtime across multiple jurisdictions. Confirm service scope and measurement period before publication.

03 A platform for the next stage

The supplied homepage describes a foundation for Zero Trust, SASE, and ongoing operational ownership. Confirm the delivered capabilities and roadmap.

Planning your next modernization?

Discuss your infrastructure, operational constraints, and security priorities.
